

**MedeaElectronique**  
**Instant Synthesis Ensemble – international open call**  
**Deadline: OPEN**

MedeaElectronique ([www.medeaelectronique.com](http://www.medeaelectronique.com)) announces its intention to create an “**Instant Synthesis Ensemble**”. Having pre-decided either upon form or a plan on which to base the evolution of the piece, we use improvisation, focusing on the communication and interaction between fellow players, so that each and every time a different version of the piece is produced.

The MedeaElectronique collective shares a tendency for innovation in performing arts, creating strong synergies within a diverse group of artists. Working in areas like music, video, design, painting, multimedia, interactive technology, robotics and production, we allow the creative merging of our distinctive areas of research and practice sculpting a distinctive style in the realization of various projects – from multimedia theatrical plays to experimental audio-visual shows and from electroacoustic compositions to human-machine-computer interfaces. MedeaElectronique also organises Electromedia Works, a bi-annual multimedia festival ([www.emw.gr](http://www.emw.gr)).

We are looking for artists active in such diverse fields as (but not limited to): electroacoustics, live electronics, instrumental improvisation, performance art, composers, creative computer programming, creative hardware modification/circuit-bending, conceptual art, drama. Ranging in styles from electroacoustic music to free Jazz, ethnic and Fusion.

The ideal participants would have interdisciplinary interests and a strong creative drive. They would be happy to share and embrace ideas, techniques, material, time and energy. They would need good social and communication skills, as well as the ability to function in a wide range of situations. A respect to the craft and the powers of improvisation is a must.

MedeaElectronique, “Instant Synthesis Ensemble” will be performing and touring during the period of Sept 2010 to May 2010 in Greece and Europe.

Travel and other costs will be covered by Medea Electronique.

Dead Line OPEN

Applications should include the following:

- Short bio, detailing areas of personal interest
- Portfolio
- Full contact details
- Links to audio/video/ image/text/other work on the web
